Preamble

The FDP on “**Research Methodology for Young Teachers & Research Scholars**” is organized with an objective to develop the expertise in conducting quality research. The program presents a systematic overview on basic Research Methodology from selection of a research problem to completion of the report. The lecture series would illustrate examples to provide an understanding to develop research ideas, procedures to conduct research and for application.

The program would enable novice researchers to undertake small-scale quality research projects useful for academics and industry. It would also disseminate knowledge required to integrate research into curricula and profession.
